

Dineshkumar Varatharaj

Professional Profile

Education

Master of Business Administration (MBA) | Bharathiar University | 2020 – 2022 | 81%
Bachelor of Engineering (BE) | Anna University | 2016 – 2020 | 73%

Certifications and Knowledge

Google Project Management – Coursera
Strategic Management – IIM Bangalore
Artificial Intelligence Fundamentals - IBM SkillsBuild
Google Analytics for Beginners

Key Capabilities and Tools

Project Management Office (PMO): Project planning, scheduling, coordination, resource tracking.

Stakeholder & Delivery Management: Stakeholder communication, dependency coordination.

Risk Controls: Risk and issue tracking.

Data Analysis & Reporting: Power BI dashboards, KPI tracking.

AI & Data-Driven PMO: AI tool monitoring, data-driven insights, structured project data analysis.

Documentation & Governance: Project documentation, standard reporting, process compliance.

Tools & Methodologies: Microsoft Project, Power BI, Asana, Sembly AI, Claverty, Microsoft Office Suite, Agile & Waterfall methodologies.

Domain experience

Engineering & Manufacturing
Artificial Intelligence
Reporting & Analysis
Automotive

Highlights

PMO Consultant with ~4 years of experience driving AI adoption initiatives and managing technology-driven programmes through structured governance, cross-functional coordination, and data-driven delivery oversight. Hands-on in embedding GenAI and LLM-based tools into live project workflows, with strong stakeholder communication and execution discipline across global environments.

Project & PMO Management

- Project planning, scheduling, and milestone tracking across Agile and hybrid delivery models.
- Cross-functional and client-facing coordination with technical and business stakeholders in global environments.
- Monitoring of project health, risks, and delivery progress to support timely escalation and decisions.

Technical Analysis & Delivery Support

- AI tool capability assessment, competitive benchmarking, and adoption feasibility analysis to support strategic programme decisions.
- Data consolidation and structured reporting to enable performance tracking and trend visibility.
- Support to decision-making through logical, evidence-based analysis of delivery data and risks.

Digital & AI Enablement

- End-to-end coordination of enterprise GenAI adoption programmes, from stakeholder alignment through phased rollout governance and adoption KPI tracking.
- Bridging technical teams and leadership through structured insights and governance artifacts.

Delivery Discipline & Documentation

- Standardized project documentation, reporting templates, and governance artifacts.
- Support for improved ways of working through consistent processes and structured communication.
- Clear, concise, and data-driven reporting of risks, issues, and performance trends.

Career To Date

Project Management Officer (PMO) | MIGSO-PCUBED (Alten India) | 9 Months

Project: Stellantis Co-pilot AI Initiative | March 2026 – Present

- Coordinating enterprise-wide adoption of Stellantis' internal AI Assistant, enabling structured rollout of LLM-based capabilities across cross functional teams in live delivery environments.
- Driving governance across 4 Delivery Managers and 6 DPUs, ensuring alignment on rollout priorities, dependency tracking, and improving adoption tracking visibility.
- Designed a phased onboarding framework based on team capacity and business criticality, enabling AI integration with no impact on ongoing delivery timelines.

Dineshkumar Varatharaj

- Facilitating capability workshops and technical checkpoints, identifying 10+ high-value AI use cases and improving delivery efficiency through prompt-driven workflows.
- Owned programme-level progress monitoring and impediment resolution, conducting structured checkpoint reviews, tracking AI adoption KPIs, and disseminating cross-team learnings to accelerate organisation-wide LLM integration maturity.

Project: Sembly & Clayverest Integration | August 2025 – Present

- Led structured evaluation of 15+ AI meeting intelligence and conversational tools, delivering benchmarking insights and supporting leadership in adoption decisions.
- Contributing to implementation of an AI-driven proposal generation workflow using Sembly outputs, improving efficiency and reducing manual drafting effort by ~30–40%.
- Working on defining integration workflows between Sembly and Clayverest, including data handoff logic and prompt frameworks to enable structured insight-to-proposal conversion.
- Coordinated with stakeholders to validate use cases and refine workflows, improving alignment and increasing user adoption and usability feedback scores.
- Produced governance and architecture documentation covering workflows and compliance considerations, enabling standardised processes and scalable AI adoption readiness.

Associate Consultant | Careernet Technologies Pvt Ltd | 3 years

- Managed timelines, resource planning, and delivery tracking across 10+ projects, ensuring on-time and within-scope execution.
- Coordinated with 20+ stakeholders across departments to align goals, streamline operations, and reduce delays.
- Developed project trackers and Power BI dashboards, improving reporting visibility and enabling data-driven decisions.
- Conducted risk assessments and implemented mitigation strategies using structured methodologies.
- Delivered governance reports summarising project health, risks, and performance insights for leadership.

Project Planning Intern | Aqua Sub Engineering | 1 month (Internship)

- Assisted in planning and tracking project tasks, contributing to improved schedule adherence.
- Supported documentation and coordination across departments for engineering workflows.

PMO Intern | Indico Motors | 1 month (Internship)

- Conducted market analysis on Electric Vehicles (EVs) to identify industry trends and strategic opportunities.
- Developed actionable insights to support project planning and new product positioning.
